1. Catalogue

We design and manufacture our main products for **direct sale**, **rental** and **assembly**:

Tents
Tents
Tarpaulins for swimming pools
Tarpaulins for trucks and trailers
Awnings
Clover Baths toilets
Advertising totems

We also have other products for **sale** and/or **rental** and **assembly**:

Modular stands

Stages

Platforms

Chemical toilets

We complete our offer with an extensive range of articles and **complements** necessary for the **production of events** both outdoors and indoors in large spaces (outdoor weddings, fairs, congresses, mass shows, exhibitions, celebrations, public events, ceremonies...).

2. Tents

Without a doubt, our flagship product that we design and manufacture in our facilities. To do this, we use high-quality materials both in the textile components (canvases and veils) and in the structural ones.

The **taraulins** that we use to create our tents are made of polyester, high tenacity, waterproof, non-deformable and fire retardant. With a fire resistance classification M2, subjected to anti-mold, anti-UVA, anti-saline environment treatment and provided with non-stick varnish.

The **structural elements** are made of aluminum and galvanized iron material. Very solid, they withstand gusts of wind of up to 90 km / hour.

The modular design of our tents allows us to adapt to all needs:

By capacity: from small-format events to large concentrations.

3. Jaimas

Together with the tents, our JAIMAS are the result of our own design and production. We make them with high quality materials both in the textile components (canvases and veils) and in the structural ones.

The **canvases** that we use to create our JAIMAS are made of polyester, high tenacity, waterproof, non-deformable and fire retardant. With a fire resistance classification M2, subjected to anti-mold, anti-UVA, anti-saline environment treatment and provided with non-stick varnish.

The **structural elements** are made of aluminum and galvanized iron material. Very solid, they withstand gusts of wind of up to 90 km / hour.

4. Scenarios

Due to their modular design, our stages adapt to any size, height and format.

The basic unit of **our medium and large format stages** is the 2500x1000x100mm **stage**. These units are made up of 1 28mm thick phenolic board integrated into an anodized aluminum structure and are machined using 100mm battens for easy tongue and groove mounting.

Technical characteristics:

Anti-slip

Resistant to water and high temperatures.

Abrasion resistant

Torsion resistant

High load capacity

The **structure** that supports the pallets is based on a multidirectional galvanized iron scaffolding system that complies with the UNE 76-502-90 and 76-505-91 standards as certified by the Spanish Association for Standardization and Certification (**AENOR**).

The versatility and resistance of our stage model allows us to adapt to any orography and / or space, without limit of shapes or meters of surface. The height can vary from 0'16m to 2m, although for special needs the required height can be reached.

8. Sanitary ware

The **Clover Baths toilets** of our own design and production are perfect for events due to their adaptability both indoors and outdoors, but they can also be used in case of temporary toilet needs in companies.

These toilets are available in two systems: freestanding and mains connected.

Dimensions: 2280mm x 1000mm x 2370mm.

Among its main features are that its finish can be customised to suit different environments, it has natural ventilation to guarantee a pleasant environment, quality materials such as stainless steel for the toilet and accessories, sliding door and manual closing, washbasin, lightning protection, minimum environmental impact and 500 wastewater discharges plus another 500 discharges by means of a foot pump in the washbasin.
